

## THE ADVANTAGES OF USING CLEAR FACE SHIELDS INSTEAD OF FACE MASKS

### Can Replace Safety Glasses

In many cases, face shields eliminate the need for safety glasses and goggles (in low hazard environments).

### Show Off Your Smile

Our crystal-clear material won't hide your mouth, making it easier to speak and less intimidating to customers & coworkers. Because it is virtually invisible, it can be worn for long shifts with no dizziness.

### Breathe Easy! No Claustrophobia!

Our extra-thick, latex-free foam keeps the visor away from your face, which promotes excellent air flow to prevent headaches. It also provides room for glasses, larger noses, and even headsets.

### Ergonomic Design

The unique shield shape and comfortable straps allow for free range of head motion without the shield hitting your shoulders and won't leave sores or rashes around your mouth, nose and ears.

### Reusable

Our durable design makes clean-up and reuse easy. It even has a space to put your name to avoid mix-ups.
